EDUCATION

2015	The George Washington University Department of Physics	Ph.D.
	Thesis: LIGO gamma-ray burst searches in the aLIGO Era: An Optimized Burst Database and a New Method for Detecting Intermediate-Duration GWs Advisor: Alessandra Corsi	
2011	University of Massachusetts Dartmouth Department of Physics	M.S.
2007	University of Massachusetts Dartmouth Department of Physics	B.S.

PROFESSIONAL APPOINTMENTS

2017	University of Rhode Island Department of Physics	Lecturer
2015	Texas Tech University Department of Physics	Postdoctoral Research Associate

SELECTED PUBLICATIONS

- 2019 Eric Sowell, Alessandra Corsi, and Robert Coyne. Multiwaveform cross-correlation search method for intermediate-duration gravitational waves from gamma-ray bursts. *Phys. Rev. D.*, 100(12):124041, December 2019. doi: 10.1103/PhysRevD.100.124041
- 2019 The LIGO Scientific Collaboration, the Virgo Collaboration, and IPN Collaboration. Search for Gravitational-wave Signals Associated with Gamma-Ray Bursts during the Second Observing Run of Advanced LIGO and Advanced Virgo. *Astrophys. J.*, 886(1):75, November 2019c. doi: 10.3847/1538-4357/ab4b48
- 2017 The LIGO Scientific Collaboration, the Virgo Collaboration, and The IPN Collaboration. Search for Gravitational Waves Associated with Gamma-Ray Bursts during the First Advanced LIGO Observing Run and Implications for the Origin of GRB 150906B. *Astrophys. J.*, 841:89, June 2017. doi: 10.3847/1538-4357/aa6c47
- 2017 LIGO Scientific Collaboration and Virgo Collaboration. GW170817: Observation of Gravitational Waves from a Binary Neutron Star Inspiral. *Physical Review Letters*, 119(16):161101, October 2017. doi: 10.1103/PhysRevLett.119.161101

- 2017 LIGO Scientific Collaboration and Virgo Collaboration, Fermi Gamma-ray Burst Monitor, and INTEGRAL. Gravitational Waves and Gamma-Rays from a Binary Neutron Star Merger: GW170817 and GRB 170817A. *Astrophys. J. Lett.*, 848:L13, October 2017. doi: 10.3847/2041-8213/aa920c

AWARDS AND HONORS

- 2017 Einstein Medal (as a member of the LSC)
- 2017 Princess of Asturias Award for Technical and Scientific Research (as a member of the LSC)
- 2017 Bruno Rossi Prize (as a member of the LSC)
- 2016 National Space Club Huntsville Distinguished Science Award (as a member of the LSC)
- 2016 The Gruber Cosmology Prize (as a member of the LSC)
- 2016 The Special Breakthrough Prize in Fundamental Physics (as a member of the LSC)
- 2013 LIGO Scientific Collaboration Best Analysis/Theory Poster
- 2012 AAPT Outstanding Teaching Assistant Award

CONFERENCES, COLLOQUIA AND SEMINARS

Invited talks

- 2018 Gravitational Wave Astronomy with CoCoA: A data analysis technique for the post-detection era, APS New England Section 2018 November Meeting
- 2018 Gravitational Waves: The Frontier of Astronomy, SIMULIA — Dassault Systèmes, Johnston Rhode Island, July
- 2017 Making Gravitational Wave CoCoA: A cross-correlation search for gravitational waves from the universe's most relativistic explosions, University of Rhode Island Physics Colloquium 2016-2017 Series, March 31
- 2016 Gravitational Waves: “Soundtrack” to the Cosmic Cinema, keynote presentation at 2016 Computational Physics Symposium held at UMass Dartmouth, April
- 2015 A cross-correlation search for intermediate duration gravitational wave transients: Advanced techniques for the advanced detector era, colloquium given for University of Massachusetts, Dartmouth Department of Physics, April

Contributed talks

- 2018 Search for Gravitational Waves Associated with Gamma-Ray Bursts During the Second Advanced LIGO Observing Run, on behalf of the LSC, 2018 APS April Meeting
- 2016 Multi-messenger observations of gamma-ray bursts in the magnetar scenario, 8th Huntsville GRB Symposium, October
- 2016 Multi-messenger observations of gamma-ray bursts in the magnetar scenario, accepted talk for the subsequently canceled COSPAR 41
- 2015 A cross-correlation search for intermediate duration gravitational waves from gamma-ray burst magnetars, 2015 APS April Meeting
- 2014 Gravitational wave emission from long GRB central engines, the Second Annual DC-MD-VA Summer Astrophysics meeting, July

Poster Presentations

- 2016 A cross-correlation approach for detecting intermediate duration gravitational waves, poster for GWPAW, June 2016
- 2013 No “051103-like” gamma-ray burst left behind: towards a literature informed database for LIGO-Virgo gamma-ray burst searches, award winning poster at the 2013 March LVC meeting

Campus or departmental talks

- 2017 From Nobel to Neutron Stars: how gravitational waves are shaping 21st century astronomy, University of Rhode Island Physics Colloquium 2017-2018 Series, November 10,
- 2016 Making Gravitational Wave CoCoA: A cross-correlation approach for detecting intermediate duration gravitational waves, seminar for the Texas Tech University Department of Mathematics Seminar in Applied Mathematics series, April

RESEARCH EXPERIENCE

Faculty at University of Rhode Island

- 2019-Present Continued development of Cross-Correlation Algorithm (COCOA) for use in intermediate-duration gravitational wave transient searches, see [Sowell et al., 2019].
- 2018-Present Co-Investigator for Chandra proposal #20610056, entitled, “Geometric Distances to the Magellanic Clouds and GRB Prompt X-ray Emission study Via Dust Scattering”
- 2018-Present Development of novel high performance computing platforms for undergraduate-centric learning in the “HPC Age.” Uses cluster of 88 Playstation 3 systems networked together for highly parallelized computing projects.
- 2018 Established informal “University of Rhode Island Gravitational Wave Research Group” (URI-GW) program to encourage undergraduate research involving gravitational waves. 8 founding members.
- 2017-Present Council member for URI membership in the LIGO Scientific Collaboration (LSC). Research interests include data analysis and database support for gravitational wave searches from gamma-ray bursts in association with the LSC, including the development of a literature-informed database of gamma-ray bursts from multiple EM observatories and long-duration GW transient searches.

Postdoctoral Research Associate (Texas Tech University)

- 2015-2017 Intermediate duration Gravitational Wave transient searches in association with the LSC, including development of a new data analysis pipeline
- 2015 Co-Investigator for VLA proposal VLA/15B-288: Probing the magnetar scenario for gamma-ray bursts with the VLA
- 2015-2017 Data analysis and database support for gravitational wave searches from gamma-ray bursts in association with the LSC, including the development of a literature-informed database of gamma-ray bursts from multiple EM observatories

Graduate Research Assistant (Ph.D. at The George Washington University)

- 2013-2015 LIGO gamma-ray burst searches in the aLIGO Era: An Optimized Burst Database and a New Method for Detecting Intermediate-Duration GWs in association with the LSC
- 2012-2013 Gamma-ray burst variability studies related to GRB prompt emission and classification
- 2012 Student performance in active learning environments using the “SCALE-UP” (Student-Centered Active Learning Environment Undergraduate Programs) format
- 2012-2013 Variability analysis of Cataclysmic Variable V1504 Cygni using Kepler data

Graduate Research Assistant (M.S. at the University of Massachusetts Dartmouth)

- 2009 Playstation 3 High Performance Computing cluster applications for gravitational wave emission from intermediate-mass black hole-inspirals
- 2007-2009 Benchmarking Playstation 3 High Performance Computing cluster for nuclear physics applications

PROFESSIONAL MEMBERSHIPS

LIGO Scientific Collaboration member since 2013

American Association of Physics Teachers member from 2012-2013 and since 2016

American Physical Society member since 2009

TEACHING EXPERIENCE

University of Rhode Island

Year	Fall	Spring	Summer
AY 2020-2021	Gen. Phys. I Elem. Phys. II	Elem. Phys. II Elem. Modern Phys.	
AY 2019-2020	Gen. Phys. I Elem. Phys. II	Gen. Phys. II Elem. Phys. II Elem. Modern Phys. General Relativity	Elem. Phys. II Elem. Phys. III
AY 2018-2019	Gen. Phys. I Elem. Phys. II	Elem. Phys. II Elem. Modern Phys.	Elem. Phys. II

Continued on next page

Table 1 – continued from previous page

Year	Fall	Spring	Summer
AY 2017-2018	Gen. Phys. I Elem. Phys. II	Elem. Phys. II Elem. Modern Phys.	

General Relativity Upper division (advanced undergraduate or graduate) course covering special relativity, tensor calculus, derivation of the Einstein field equations, specific solutions thereof (i.e. Schwarzschild, Kerr), and gravitational waves. Small enrollment. First offering: Spring 2020.

Elementary Modern Physics Survey of foundational modern physics concepts covering introductory special relativity, quantum mechanics, and an introduction to practical concepts in elementary field theory and the standard model. Small to moderate enrollment. Active Learning (Clickers). First offering: Spring 2018.

Elementary Physics III Calculus-based introductory course covering thermodynamics, geometric optics, electromagnetic waves. Small enrollment. Active Learning (Clickers), Metacognition (Wrappers, Value Statements). First offering: Summer 2020.

Elementary Physics II Calculus-based introductory course covering electricity and magnetism, leading to Maxwell's equations. Electric fields and Gauss' law; magnetic fields and Ampere's law. Capacitance and inductance, DC and AC circuits. Electromagnetic waves. Large enrollment. Active Learning (Clickers), Metacognition (Wrappers, Value Statements). First offering: Fall 2017.

General Physics II Algebra-based introductory course covering optics, electricity, magnetism, and modern physics. Small enrollment. Active Learning (Clickers), Metacognition (Wrappers, Value Statements). First offering: Spring 2020.

General Physics I Algebra-based introductory course covering mechanics, heat, and sound. Small to moderate enrollment. Active Learning (Clickers), Metacognition (Wrappers, Value Statements). First offering: Fall 2017.

Texas Tech University

General Physics II Algebra-based introductory course for non-physics majors. Covers electric fields, magnetic fields, simple circuits, electromagnetic waves, geometric optics, and selected topics from modern physics. ≈ 30 students. Year offered: 2017.

The George Washington University

2011 Promoted to co-instructor of Astronomy introductory course for non-majors in the SCALE-UP format, took on expanded role beyond typical responsibilities of a GTA. Year offered: 2011.

2010-2011 Directed the Intermediate Undergraduate Lab, geared for junior- and senior-level undergraduates in physics. Involved maintaining the lab equipment, developing new laboratory exercises, and supervising classroom activities in the lab for experiments that covered a wide array of physics subfields. Years offered: 2010-2011.

The George Washington University (Teaching Assistant)

2012 General (algebra based) physics course in the SCALE-UP format, involved in physics education research on active learning environments and their effect on student performance. Active Learning (SCALE-UP). Years offered: 2012

2009-2012 Astronomy Introductory courses (covering both Stars/Planets/Life in the Universe as well as the Origins of the Cosmos) in both traditional lecture format as well as in the "SCALE-UP"

format. Courses taught in the traditional format involved supervising laboratory activities, whereas SCALE-UP classes involved supervising students in an active learning environment, overseeing laboratory activities, and delivering lectures. Moderate enrollment. Active Learning (SCALE-UP). Years offered: 2009-2012.

University of Massachusetts, Dartmouth (Teaching Assistant)

- 2008** Served as a graduate teaching assistant for introductory physics courses for non-majors in a primarily standard lecture format.
- 2007-2009** Served as both an undergraduate and graduate teaching assistant as a senior undergraduate in the first two semesters of Physics for Applied Science and Engineering taught in the IMPULSE format. This involved working alongside both a graduate teaching assistant as well as a faculty instructor in an active role, overseeing lectures, assisting with in-class work, and occasionally delivering lectures.

MENTORING

- ICERM Postdoctoral Mentor** Caroline Mallary, Brown (2020)
- ICERM Graduate Mentor** Rafia Sarwar, Institute of Space Technology (2020)
- Graduate Research Advisor** Michael St. Pierre, URI (2019)
- Graduate Research Co-Advisor** Eric Sowell, TTU (2016-2017)
- Undergraduate Research Advisor** Tyco Mera Evans, URI/Brown (2020)
- Undergraduate Research Advisor** Christopher Nadeau, URI (2019-2020)
- Undergraduate Research Advisor** Simon Trcka, URI (2019-2020)
- Undergraduate Research Advisor** Justin Allen, URI (2018-2019)
- Undergraduate Research Advisor** Daniel Bosquet, URI (2018-2018)
- Undergraduate Research Advisor** Michael St. Pierre, URI (2018-2019)
- Undergraduate Research Advisor** Samantha Carbone, URI (2017-2018)
- Undergraduate Research Co-Advisor** Chance Norris, URI (2015-2016)
- Summer Research Co-Advisor** Matteo Di Giovanni, TTU (2015)
- Summer Research Co-Advisor** Igor Andreoni, GWU (2013)
- Clark Scholar (High School) Co-Advisor** Nishit Mishra, TTU (2016)
- High School Research Advisor** Aiden Saulnier, URI (2019)
- High School Research Advisor** Paarth Tandon, URI (2019)
- High School Research Advisor** Alexander Pela, URI (2018)

SERVICE TO PROFESSION

- Referee** Journal referee for APS Journals, Physical Review X (2017-Present)
- Referee** Journal referee for APS Journals, Physical Review D (2016-Present)
- LVC** Gamma-ray burst Archivist for the LIGO Scientific Collaboration (2015-Present)
- LVC** Data analysis advocate for gamma-ray bursts during LIGO's second observing run (2016-2017)
- LVC** Data analysis advocate for gamma-ray bursts during LIGO's first observing run (2015-2016)
- Local Organizing Committee (member)** The 2nd Annual DC-MD-VA Astrophysics Summer Meeting (2014)

Local Organizing Committee (member) LIGO-Virgo-Fermi collaborations international workshop on Gamma-ray Bursts and Gravitational Waves (2013)

SERVICE TO UNIVERSITY

Member Physics Advisory Board, University of Massachusetts Dartmouth

Participant University of Rhode Island Welcome Days representative from physics department (annual)

Participant University of Rhode Island Open House representative from physics department (annual)

Convener Astronomy group meetings at Texas Tech University (2016)

Convener Astronomy group meetings at George Washington University (2013-2016)

OUTREACH AND PUBLIC RELATIONS

2020 Astronomy Outreach event in support of the Science Olympiad, Mount Saint Charles Academy, Virtual, October 21st.

2020 John Marshall Memorial Lecture (Invited), Crescendo of the Cosmic Symphony: Gravitational Waves and the New Frontier of Astronomy, Amateur Astronomers Association of New York Lecture Series at the American Museum of Natural History in New York City, New York, March 13th.

2019 Outreach event, Campus Crusade, organized in collaboration with Dr. Douglas B. Gobelle and Dr. Michael Tammaro (both members of URI Physics department). Hosted approximately two dozen students from the Greene School on November 2nd for a series of physics activities including projectile motion contest, a planetarium show, and a superconducting demonstration with liquid nitrogen. Personalized 3D-printed daVinci-inspired telescopes were provided for each participating student.

2019 Outreach talk entitled “Gravitational Waves: The Frontier of Astronomy” at Bourne High School for approximately 60 high school science students on October 22nd.

2019 Appeared on official LEGO youtube channel as guest-host for the *LEGO WRECKING Ball Strength Challenge*¹ episode on the REBRICKULOUS channel.

2018 Gravitational Waves: The Frontier of Astronomy, public lecture given at the Contemporary Theater Company in Wakefield, RI in May.

2018 Appeared on official LEGO youtube channel as guest-judge and host for the *Egg Drop Challenge Part 2!*² episode on the REBRICKULOUS channel.

2018 Subject of a feature story in UMass Dartmouth Magazine titled, *Robert Coyne '07, MS '11 Appointed physics lecturer at University of Rhode Island*

2017 Subject of news story in Providence Business News titled, *Nobel prize-linked physicist joins University of Rhode Island faculty*

2017 Interview for URI Today describing the LVC detection of a binary neutron star merger titled *URI physics lecturer part of new era in astronomy*.

2017 Panelist on “Ask an Astrophysicist” panel at Lubbock-Con 2017

2016 Interview describing the first detection of gravitational waves by LIGO titled *Bourne Grad Part of Team that Made Cosmic Breakthrough* for The Bourne Enterprise

2016 Participated in outreach on social media via a reddit “Ask Me Anything” (AMA) titled *We are the LIGO Scientific Collaboration, and we have made the first direct detection of gravitational waves and the first observation of two black holes merging. Ask us anything!*

¹<https://youtu.be/SvV743jSraA>

²<https://youtu.be/t10Krzj5Z-Ew>

- 2014** Gravitational Waves: The Frontier of Astronomy, public lecture given at George Mason University in November.
- 2014** Volunteer participant (and assistant organizer for contributions from the George Washington University) in the “2014 Astronomy Festival on the National Mall” which included several demonstrations of physics and astronomy concepts associated with gravitational wave detection.
- 2013** Outreach talk on the origins of the cosmos to IB (International Baccalaureate) high school students at the Academy of the Holy Cross in Kensington, Maryland
